5. Continuously press throttle to speed up.

6. Grasp the brake handle to slow down or stop.

7. When the scooter stops or run at a slow speed, you can get off.

4 Battery Instruction

The instruction shows how to charge and maintain the battery, some safety notices and the specification. Please use the battery properly according to this instruction to prolong the battery life and its performance.

4.1 Battery Parameters

| Name | Parameter | Name | Parameter | Name | Parameter |
|---------------|----------------|----------------------|-----------|-------------------------|------------------------|
| Type | Li-ion battery | Working Temperature | 0°C-35°C | Store Time (-10°C-40°C) | 3 months (full charge) |
| Charging Time | 5-7 hours | Charging Temperature | 0°C-35°C | Initial Volume | 7.8Ah/10Ah |
| Voltage | 36V | Max Charging Voltage | 42V | Max Charging Current | 2A |

4.2 Battery Safety

Do not continue to use the battery when the following conditions occur:

- The battery of the electric scooter should be used only with local law. Only for professionals to disassemble and maintain the battery.
- Odor or excessive heat; leak any substance; do not touch anything leaking from the battery.
- Do not let children and animals touch the battery. Must unplug the charger before installing the battery or riding. In the case of charging, it is very dangerous to do anything related to electric vehicles.
- If you want the electric scooter to run most efficiently, the battery must be charged and used within the temperature range indicated in the battery specifications.
- Lithium batteries are considered dangerous and require local law to allow transportation.
- The battery contains dangerous substances. Please do not open the battery. Do not insert anything into the battery.
- It is forbidden to charge a lithium battery that has been over-discharged. A battery that has been over-discharged has a safety hazard and can only be scrapped.

Tip: When the internal temperature of the battery exceeds 45 °C, the battery is protected.

⚠ Do not charge the battery at high temperature (45 ° C) or Charge the battery in a high temperature (40 ° C) environment.

⚠ Only use the original charging equipment to charge the electric scooter.

4.3 Charging step

- Open the charging port cover, Make sure the charging port is clean and dry.
- Connect the charger with the battery and the other end with power(100V-240V;50/60Hz), make sure the charging indicator is on.
- When the charger indicator is red, it will charge normally. Otherwise, please check if the plug is connected properly.
- When the charger indicator is green, charging is complete.

Charging method:

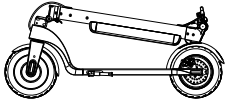

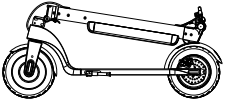

Tips:

Connect the charger to the AC power firstly, then connect it to the battery when the green indicator light is normally on.

After charging, cover the dustproof rubber to prevent something from entering the charging port and causing battery failure.

6 Maintenance

Maintenance considerations :

- Make sure the electric scooter charger and charging line are disconnected and ensure that the electric scooter is off.
- Wipe the shell with a soft cloth to clean the electric scooter. Please don't put more lubricating oil on bearing when you do the maintenance for it.

⚠ Warning

- It is forbidden to clean electric scooters by using water cannon or soaking in liquid. This will cause permanent damage of the electronic devices in the host.

Storage

- Please charge your electric scooter before storage, for preventing the battery from discharging too long time. Please ensure charge at least once every three months.
- If the storage environment temperature is lower than 0 °C, please don't charge electric scooter. Please put it in inside environment temperature (above 10 °C) and then charge, storage temperature is - 10 °C to 35 °C.
- Please keep the electric scooter in a suitable place indoor, dry and appropriate temperature. You can mask the electric scooter to prevent from the dust.

⚠ Warning

- In order to protect the user's safety, the user can not take apart the electric scooter, otherwise, the user will give up the maintenance warranty rights of the product automatically.

7 Trouble shooting

Please contact the sales office or the dealer with no hesitate for repair when the electric scooter fails to ride normally.

| Description of adverse phenomena | Solution |
|----------------------------------|---|
| unable starting up | Check to see if the battery is powered |
| can not charge | 1.Check whether the plugboard has electricity ; 2.Check the charger whether connect AC plug (the light whether is on); 3.Check the plug of the charger and the charging port of the whole scooter have been inserted correctly. |
| No horn, no blue tooth signal | Check the bluetooth switch whether turn on. |

8 Packing List

Electric scooter packing list:

E-scooter: 1PC

Charger: 1PC

Manual: 1PC

Screws & Wrench: 1set

Please contact us with no hesitate if there is any breakage or missing when you open package. We will replace it for you as soon as possible.

Have a nice day!

9 Product Quality Certificate

This product is qualified by passing QC inspection and allowed to be sold on the market.

The warranty card (It takes effect upon manufacturer's seal and passing with serial number) regular sales invoice is effective maintenance certificate. Please keep the warranty card properly.
